

HAAS CERTIFICATION

Haas Certification Program

The Haas Operator Certification Program is designed to provide the basic knowledge necessary to get started as a CNC machine operator or CNC machinist. The online course offers an introduction to basic CNC machine operation, proper machine safety, and fundamental machining processes.

Once you have completed the Basic Mill or Lathe Operator online program, you must schedule a visit to your local Haas Factory Outlet where you will take a Hands-on Test. Teximp offers this Hands-On Test for EUR250/person.

To schedule an appointment contact your local Teximp HFO.

Please note, in-person assessment appointments are scheduled based on the availability of the engineering department. A non-refundable fee of EUR 250 (excl. VAT) is payable by bank transfer to Teximp at the time of each appointment for personal assessment. A participant who is unsuccessful may schedule an appointment to retake the assessment no earlier than 3 months after the date of initial assessment. Participants must provide valid photo identification at the time of the appointment.
